Questions and Answers

Date: February 7, 2007

Question 1. In the RFP it lists the prequals for both Photogrammetry and Photogrammetric Control Surveys as Primary Prequalifications. According to page 13 of the Selection Team Guidelines, proposing prime vendors need to be prequalified in both of the primary prequalifications listed. In your proposal it states that up to 4 consultants can be selected. Is it your intent to pick 2 vendors for Photogrammetry and 2 vendors for Photogrammetric Control and vendors only need to be prequalified in one category?

Answer 1. No. The Photogrammetric Control Survey prequalification category should be considered under the Secondary Prequalification Classification. The intent for this Selection is that a Firm having MDOT prequalification in Photogrammetry should be the Prime firm submitting the proposal. If the Prime Firm does not have MDOT prequalification in Photogrammetric Control Surveys, then they must provide this through a sub-consultant team that is appropriately prequalified.
